PERSONAL STATEMENT

My name is Maria, I graduated from Indiana University in December 25' with a Media BA, a concentration in Interactive & Digital Media, and a minor in informatics.

I have been working with the Adobe suite since high school where my interest in graphic design began, leading to a bigger interest in web design at the start of college.

I completed a summer 25' internship, which solidified my love for Web Design and development.

Need someone to collaborate with or work with? Look furthur down and see why I could be the perfect person.
